To whom it may concern:

I am pleased to write this testimonial letter for Mr Vincent Chua. Vincent was with us at ASM Pacific Technology EQT Software Support department for a period of 20 weeks as a software engineer intern.

He played a key supporting role in the software support team, and worked on a project with a series of deadline-based tasks. Some of the areas he assisted us in include design specification, scalable solution, functionalities of the software, user friendly software interface, design of the software application and test report.

Vincent is an independent and reliable individual who can be depended on to see a task through to its completion. He takes pride in his work, and is very meticulous and thorough in the creation and improvement of the software application.

Throughout the period of his internship, Vincent showed keen interest and diligence in his position and job scope. He devotes time and effort between scheduled tasks to read through C++ fundamentals and ASM's software manuals. As an intern, he demonstrated strong interpersonal skills and was amiable and courteous towards his colleagues. As an individual, he got along well with his team members and exhibited care and sensitivity.

It was a pleasure to watch him develop as a software engineer, and I believe his distinct qualities will be a great asset to any future organization.

Sincerely,

Wang Dahai
Technical Manager
EQT Software Support
